ONE MORE MINE IS STARTED UP

Eagle & Blue Bell of Tintic event, it is good news, locally, to learn that the mine is to be worked again Will Ship to American Smelter.

With the gates of the American Smelting company opened to the MINING STOCK EXCHANGE. mine's output, work was yesterday re-Public Is Dropping Out of Market sumed at the Eagle & Blue Bell company's property at Tintic, and when things are in full swing, as they will be within a few days, a force of forty to fifty men will be employed. In addition, a number of leasers will be given a chance at certain portions of the mine, so the outlook for a lively campaign underground is excellent. It it understood, also, that the management of the King William company, owning a group of claims on the south of the Eagle & Blue Beil, has made of the Eagle & Blue Beil, has made the successive at the case. While all other exchanges in the country have been dragging along in a desultory fashion for months, the local exchange has been enjoying a humming but the truth about the merits of the district, and that more interest is being taken right now than at any time in the past. A commercial club, with a membership of eighty live men of the camp, has been formed and one of the first things done by it has been to declare that nothing but the truth about the merits of the district and the operations of claim own-exchange has been enjoying a humming business. It is time for a slowdown, and, with extremely warm weather at hand, it pany's property at Tintic, and when

by the Bingham Consolidated company, which has become so badly involved financially since the closing down of its smelter that it is doubtful whether it will ever pull itself out of the hole. The Eagle & Blue Bell had just reached that stage of development where Captain MacVichie and others

STEVENS-DURYEA Automobile Talks Number 3-On Durability.

An automobile lacking perfect alignment cannot be classed as durable. The friction due to this defect means constant repair bills, and sooner or later a new car. The Stevens-Duryea unit power plant and its three-point suspension is the only correct method of insuring perfect alignment for all time. Furthermore, it makes possible a lighter frame and eliminates the sub-frame, necessary where the three-point suspension is not used. In purchasing a Stevens-Duryea, you acquire a car that will never give you alignment troubles.

> The Light Six, 35 H. P. Price \$3,500.00.

TOM BOTTERILL AUTOMOBILE CO. 62-64 WEST THIRD SOUTH ST.

Stevens-Duryea Company, Manufacturers, Chicopee Falis, Mass, U. S. A.

ing for results far in excess of anything previously secured, and it may be that an effort will now be made to make the mine save the description. make the mine save the day for the Bingham Consolidated company, or its successor. It may be, however, that some arrangement has been made to keep the Eagle & Blue Bell free of the predicament into which the Bingham Consolidated finds itself; but in any Commercial Club. Recently Or-

ganized, Won't Stand and that neighbors will get the chance, also, of opening properties of theirs without going to the expense of plac-ing heavy equipment. for False Reports.

Advices from the Gold Circle district ndicate that the best kind of results are being obtained from the campaign of development that is in progress all

arrangements to open that property at depth from the Eagle & Blue Bell shaft, so that will mean the employment of another bunch of men and keep the hoisting works at the mine in practically constant operation.

With extreme, so the come to come.

During the two regular and open board ties in the camp to date, attention is drawn to the fact that the Gold Circle Crown company, since beginning operations on April 1, has done, through company account and by least the company account and the company account and by least the company account and the company account account account and the company account a ers, over 1,500 feet of work.

The company is now working eighteen men, and has opened up about \$70,000 worth of ore, while a consignment of 600 sacks of fine ore is now on the way to market. In addition to the company work, fifteen leases are

operating on company ground.

H. F Watts writes that the Frying Pan tunnel on the Nevada Gold Circle company's property has been sent in sixty feet since the 14th day of last month and that a short distance far-ther will carry the face under the fine ore that was exposed on the surface.

The Midas has a shaft down nearly 100 feet in ore that samples \$45 and the management promises that a mill will be installed on the property as soon as development enough to justify its building has been performed.

On the Rex company's ground the vein has been opened for seventy feet from the bottom of a sixty-foot shaft and thirteen feet of \$25 gold ore has been developed.

At the St. Paul, controlled by Louis D. Gordon and J. P. Sweeney, about \$1,500 per month is being spent in development. A whim has recently been installed, and while the management is not giving out much information, the belief at camp is that important disclosures are being made.

The Elko Prince, the control of which recently went to New York talent, has opened a twelve-foot ledge on the surface that gives returns of better than \$200 to the ton. The Gold Crown Leasing company, operating block three on this company's ground, has sunk a shaft seventy-five feet deep and has Tree-milling ore that aver-

ages \$30 a ton. The shaft on the Baby Midas, at a depth of fifty feet, shows plenty of milling ore and development is being rapidly pushed. This property is con-trolled by P. A. Leamy of Gold Circle and a strong aggregation of Butte operators, and is considered as one of the best financed propositions in the

camp. A half dozen or more other proper ties are making the fur fly and everything points to the making of one of the best milling camps in the entire state of Nevada

IRON HAT SHARES LISTED ON EXCHANGE

The Iron Hat Mining company, owning four locations in the Tintic dison the Southern Pacific, for shipment the listing committee on the blanks trict, listed its shares on the mining to this market. A letter from the mine provided for the purpose, and under exchange yesterday. The company is says the lot has been delivered at the the question which aims to learn somerailroad with the exception of four wagonloads and these will reach their desment, the words "complete for running of treasury stock, 14,000 shares have been sold. C. P. Harville is president and C. E. Huish, secretary and treasurer of the company, which is working three men at present and which has cash on hand amounting to \$500.

The property is a youngster and the development done to date consists of where from 150 ounces silver up. Ev- been installed at the property of the one shaft sixty-five feet deep and anerybody familiar with mining knows Copper, Apex company, Park City, and other 115 feet. Iron ore, carrying about how easy it is for men in charge of the work of driving the lower tunnel \$6 in gold, silver and copper has been mining properties to get exalted ideas of the values contained in ore and of course there is a chance that some of the Carrie Mack boys have let their in the work of driving the lower tunnel seem to a connection with the ore bodies opened up. and, as indicated in the course there is a chance that some of the company, this is considered to be merely the capping of the fine progress is being made.

FOR PAST WEEK

ally comes from mines at the coming of their productive careers.

From the property down to the line of the Western Pacific the wagon haul is only about seven miles, and, believing that the road would be open to the reception of freight long ago, the company had hauled down a great deal of ore for shipment over that line. The latest word is that the company will not be ready for business for several months yet, and possessed of a consuming desire to know just what the ore would do when shipped in quantity, the management has decided to market

Total, carloads DOINGS OF UNLISTED STOCKS ON EXCHANGE

without protest on the part of some of the exchange members who have got the notion that raw prospects, without government title to the land, ought not to be taken on and given the benefits and privileges of the exchange that are accorded to dividend-earning mines and producing prospects. The last candidate for favor is the Tintic Central company, of which A. The last candidate for favor is the mand now would seem to indicate, broken compressor fame is the presi
evident that it is well thought of.

There was not much to the trading in unlisted stocks during the day, either, and ay, either, Like the regular list, after the filling of the morning the work was all professional. East Crown Point was sold at 5½ cents for cash, buyer sixty days. Ely Witch was dropped at 25 cents; East Tintic Consolidated sold at 6½ cents; Silver King Coalition at \$4 and \$4.02½, and broken compressor fame is the presi
